## RIZE CYBERSECURITY AND DATA PRIVACY UCITS ETF

Share Class: **USD Accumulating ETF**

ISIN: **IE00BJXRZJ40**

The Fund is a sub-fund of Rize UCITS ICAV (the "**ICAV**").

Managed by Davy Global Fund Management Limited (the "**Manager**") of the Davy group of companies

### OBJECTIVES AND INVESTMENT POLICY

- **FUND.** The Rize Cybersecurity and Data Privacy UCITS ETF (the "**Fund**") is a passively managed exchange traded fund ("ETF") that aims to replicate the performance of the Foxberry Tematica Research Cybersecurity & Data Privacy USD Net Total Return Index (the "**Index**").
- **INDEX.** The Index is designed to represent global publicly-traded companies that derive a significant proportion of their revenues from the cybersecurity and data privacy sector and includes Product Providers who provide hardware and software that is installed at the customer location and Service Providers whose hardware or software is accessed remotely by the customer. Companies in the "Aerospace and Defence" sector are excluded. Companies are only eligible for inclusion in the Index if they are listed on an eligible stock exchange, if they are sufficiently "liquid" (a measure of how actively a company's shares are traded on a daily basis) and if they are of sufficient size (determined by reference to the total market value of a company's shares).  
  
Within the Index, the companies are weighted according to their relative thematic scores (a measure of the proportion of a company's revenues or operating profits derived from the cybersecurity and data privacy sector) and are subject to a final adjustment to reduce the weight of some of the less liquid companies.
- **TRACKING METHOD.** The Fund will primarily invest in the companies contained in the Index in similar proportions to their weightings in the Index. The Fund may also invest in (1) other companies involved in the cybersecurity and technology sectors that have similar risk and performance characteristics to the companies contained in the Index and (2) financial derivative instruments ("**FDIs**") which are investments the prices of which are based on the companies contained in the Index and/or the companies described at (1) above.
- **DEALING.** Shares in this Share Class (the "**Shares**") are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the ICAV. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on <http://www.rizeetf.com>
- **DIVIDEND POLICY.** This Share Class does not intend to pay dividends. Any income which may result from the Fund's investments will be re-invested into the Fund.

### RISK AND REWARD PROFILE

- The Fund is rated 6 due to the nature of its investments and its risks. The rating is calculated based on historical data and may not be a reliable indication of the Fund's future risk profile. The risk category may shift over time. The lowest category on the above scale does not mean "risk free".
- As many of the companies invested in by the Fund are technology-focussed, the Fund is vulnerable to a cyclical decline in the value of the technology sector as a whole.
- Individual companies are subject to intense competition that may negatively impact their revenues and market values and therefore the Fund's value.
- The Fund also invests in small publicly-traded companies which may be less mature and therefore more vulnerable to adverse business or economic events and greater and more unpredictable price changes than larger companies, the technology sector as a whole or the stock market as a whole.
- The Fund invests in global equity securities. As such there is a risk of loss arising from exchange rate fluctuations or exchange control regulations.
- Other: (1) Third party service providers (such as the ICAV's depositary) may go bankrupt and fail to pay money due to the Fund or return property belonging to the Fund. (2) If the Index provider stops calculating the Index or if the Fund's license to replicate the Index is terminated, the Fund may have to be closed. (3) It may not always be possible to buy and sell the Fund's Shares on a stock exchange or at prices closely reflecting the Net Asset Value. (4) There is no capital guarantee or protection on the value of the Fund and investors can lose all the capital invested in the Fund. (5) Please refer to the "Risk Factors" section of the ICAV's Prospectus and the Fund Supplement.
