Fund Summary

The Rize Digital Payments Economy UCITS ETF (PMNT) seeks to invest in companies that potentially stand to benefit from the structural transition away from traditional cash payments to the speed and convenience of digital wallets, digital payments and digital currencies. PMNT seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the Foxberry Digital Payments Economy Index.

Why PMNT?

- **Favourable Growth Prospects**

  PMNT is Europe’s new digital payments economy ETF, and provides investors with exposure to companies that are leading the structural transition toward online and digital payments, digital wallets and digital currencies.

- **Powered by Euromonitor®**

  PMNT is purpose-built in collaboration with Euromonitor, a strategy research firm based in London, United Kingdom, and leverages their unique insights and proprietary classification system of companies that are leaders and innovators in the digital payments economy.

- **Unconstrained Approach**

  PMNT’s composition transcends classic sector, size and geographic classifications by tracking an emerging theme.

- **ETF Efficiency**

  In a single trade, PMNT delivers access to dozens of companies that are favourably positioned to ride the tailwinds of the digital payments economy theme.

Index Summary

The Foxberry Digital Payments Economy Index provides exposure to companies that are building the frictionless digital payments economy of tomorrow. These companies include card payment networks, payment processors, payment infrastructure providers, payment services and solutions providers and digital/crypto currency pioneers that are accelerating the structural transition from traditional cash payments to the speed and convenience of digital wallets, digital payments and digital currencies. The index follows a purity-based weighting scheme where companies with higher revenue exposure to the theme achieve a bigger weight in the index.

Risk Factors

- All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.
- As many of the companies invested in by PMNT are technology-focused, PMNT is vulnerable to a cyclical decline in the value of the technology sector as a whole.
- Individual companies are subject to intense competition that may negatively impact their revenues and market values and therefore PMNT's value.
- PMNT also invests in small publicly-traded companies which may be less mature and therefore more vulnerable to adverse business or economic events and greater and more unpredictable price changes than larger companies, the technology sector as a whole or the stock market as a whole.

- PMNT invests in global equity securities. As such, there is a risk of loss arising from exchange rate fluctuations or exchange control regulations.
- Other: (1) Third-party service providers (such as the ICAV's depositary) may go bankrupt and fail to pay money due to PMNT or return property belonging to PMNT. (2) If the index provider stops calculating the index or if PMNT's license to replicate the index is terminated, PMNT may have to be closed. (3) It may not always be possible to buy and sell PMNT's Shares on a stock exchange or at prices closely reflecting the Net Asset Value. (4) There is no capital guarantee or protection on the value of PMNT and investors can lose all the capital invested in PMNT. (5) Please refer to the "Risk Factors" section of the ICAV’s Prospectus and the Fund Supplement.
