

Fund Summary

The Rize Circular Economy Enablers UCITS ETF (CYCL) seeks to invest in the leading enabling companies that potentially stand to benefit from our transition to a more circular economy. These are companies that view the shift to a circular economy as a means of achieving truly sustainable growth by decoupling productive economic activities from the linear consumption of the Earth's finite resources and thereby reducing pressure on our ecosystems and environment. These are companies that are making a substantial contribution to "The Transition to a Circular Economy" objective of the EU Taxonomy of Sustainable Activities, either through their own Circular Products and Services or through Enabling Products and Services that support (i.e. enable) other companies (i.e. industry practitioners) to enhance circularity within their own business models. CYCL seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the Foxberry SMS Circular Economy Enablers Index.

Why CYCL?

Favourable Growth Prospects

CYCL is Europe's first circular economy enablers ETF, and provides investors with exposure to companies that stand to benefit from our transition to a circular economy.

Index Summary

The Foxberry SMS Circular Economy Enablers Index is to provide exposure to global publicly-traded companies that see the transition to a circular economy as a pathway to more sustainable economic growth in a way that decouples economic growth from the linear use of the Earth's finite resources and reduces pressure on the environment and our ecosystems. These are companies that are making a substantial contribution to "The Transition to a Circular Economy" environmental objective, either through (1) their own Circular Products and Services (i.e. the direct provision of enabling products or services that are circular in nature and/or directly contribute to an improvement in the state of the natural environment); or (2) Enabling Products and Services (i.e. activities that support (i.e. enable) other companies (i.e. industry practitioners) to enhance circularity within their own business models).

Risk Factors

- All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.
- The Fund may be subject to the risks associated with (1) companies that provide products and services that are circular in nature and/or directly contribute to an improvement in the state of the natural environment (for example, companies involved in recycling activities may be negatively impacted by weakened demand for their services as a result of waning government support for circular initiatives in the future, or, conversely, may be negatively impacted by increased competition as circular economy initiatives gain traction) and/or (2) companies that provide product and services that support (i.e., enable) other companies (i.e., industry practitioners) to enhance circularity within their own business models (for example, such enabling company might be exposed to the risks of weakening demand from companies from the companies/industries that they provide enabling services to due to idiosyncratic risks and economic challenges facing those particular companies/industries. Some companies may be smaller and less experienced companies, with limited product lines, markets, or financial resources and fewer experienced management or marketing personnel. They may experience extreme price and volume fluctuations that are often unrelated to their operating performance.
- The Index is typically comprised of a mix of micro, small, mid, and large capitalisation companies. Micro and small capitalisation companies may be more vulnerable to adverse business or economic events than larger, more established companies and may underperform other segments of the market or the equity market as a whole. Securities of micro and small capitalisation companies generally trade in lower volumes, are less liquid, and are often more vulnerable to market volatility and greater and more unpredictable price changes than larger capitalisation stocks or the stock market as a whole.
- Other: (1) Third-party service providers (such as the ICAV's depositary) may go bankrupt and fail to pay money due to CYCL or return property belonging to CYCL. (2) If the Index provider stops calculating the Index or if CYCL's license to replicate the Index is terminated, CYCL may have to be closed. (3) It may not always be possible to buy and sell CYCL's Shares on a stock exchange or at prices closely reflecting the Net Asset Value. (4) There is no capital guarantee or protection on the value of CYCL and investors can lose all the capital invested in CYCL. (5) Please refer to the "Risk Factors" section of the ICAV's Prospectus and the Fund Supplement.

The Rize Circular Economy Enablers UCITS ETF replicates the Foxberry SMS Circular Economy Enablers Index. An investment in the Fund involves significant risk and is subject to the volatility of companies that provide circular products and services (e.g. recycling activities) or products and services that support other companies to enhance circularity within their own businesses.

Capital at Risk Warning – Please note that the value of an investment and any income taken from it is not guaranteed and can go down as well as up. You may not get back the amount you originally invested. If your investment currency is different to the Funds' currency of denomination (USD) or the currencies in which the Funds' assets are denominated (which may be a range of different global currencies), then the return you will get from your investment may increase or decrease as a result of currency fluctuations between your investment currency and such currencies.
